

Helsingborg, September 13th 2021

Dear clients,

We are still facing increasing prices on the road traffic in Europe due to lack of availability of trucks and drivers. Prices are increasing rapidly, and we need to react towards the current situation.

The cabotage rules has now had their impact on the utilization of the trucks and we see drivers leaving the trucking business due to lower efficiency and larger risk.

The prices are constantly increasing and to be able to maintain the current fleet and hopefully in the future grow the fleet, we need to be able to follow the regulations in the market.

This is the reason that we, as from 1/10-21, must increase our prices for our activities in Finland, Norway, and Domestic Sweden with 7,9%. All other markets: 5%

1st of March 2022, we expect the Mobility Package to be brought into force and the impact of that, is impossible to predict

We hope for your understanding of the need for a freight adjustment to ensure our service level and we look forward to a continued good cooperation.

Kind Regards,
NTG East AB
